A powerful solution for all businesses.

Offering over 20 different services for all businesses.

Super Application is an All—In—One application where you can access all the necessary urban services such as online taxi, courier and delivery services, online medical and nursing services, tourism, ticket booking, online food ordering, bread collection, online sales and recycling services, and more. It provides a new approach to simplify and streamline software solutions for startups and businesses. With the help of Super Application, both small and large businesses can compete with well—known brands and provide intelligent and online services. The Super Application implements more than 20 urban service services.
